LcM Special flap wheel

FOUR-LAYER FLAP WHEEL FOR EXTREMELY FINE POLISHING

CLOTH · SISAL · LEATHER · FOAM

CAST CORE

DESCRIPTION

The special flap wheels were developed for processing all thermoplastic edges in combination with LcM cleaning agents of the Lc 2/.. series.

INTENDED USE

The cloth in the flap quickly absorbs the previously applied cleaning agent, while the sisal polishes the edgeband. The cast mounting core provides high stability when rotating in the machine.

AREAS OF USE

Compared with the cloth-sisal flap wheels, the special flap wheels have a different structure made of four layers – cloth, sisal, leather and foam – making them the solution for extremely fine polishing.

AVAILABLE VARIANTS

ITEM NO.	DESIGNATION	Ø × W × BORE (MM)
30280	Lc 3/280	160 × 30 × 50

Further variants on request.
