LcM ribbed belt

POLISHING BELT FOR CLEANING ON BOTH SIDES

POLISHES THE RADIUS | DEBURRS THIN EDGES | FOR HIGH-GLOSS & ACRYLIC

DESCRIPTION

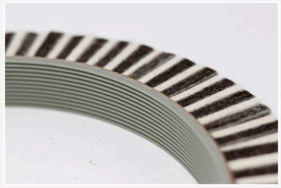

The ribbed belt is ideal for cleaning workpieces on both sides. The various lamellae polish the radius of the edgeband and at the same time reduce undesirable stress whitening.

With thin edges, overhangs are removed and the edgeband is deburred.

RECOMMENDATION

With the BRUSH-tec® ONE, cleaning the front edge in the pass is recommended – also for high-gloss and acrylic edges.
