Cloth-sisal flap wheels

FLAP WHEELS FOR ALL THERMOPLASTIC EDGES

LONG SERVICE LIFE | CAST CORE | 3 × CLOTH / 1 × SISAL

DESCRIPTION

The cloth-sisal flap wheels have been developed for the woodworking and furniture industries. The cloth in the flaps quickly absorbs the glue on the surface and the previously applied cleaning agent; the sisal insert polishes the edgeband.

AREAS OF USE

Developed for processing all thermoplastic edges in combination with the LcM cleaning agents.

BENEFIT

The cast mounting core provides high stability when rotating in the machine. The flaps are arranged in the sequence 3 × cloth and 1 × sisal. A particular advantage of the LcM range is the very long service life.

YOUR BENEFITS

- Polishing of the edges
- No stress whitening
- Good compaction of the material
- More grip of the edgeband
- Deburring of the edgeband
